MEMORANDUM FOR : Project Director  
SUBJECT : Ramo-Wooldridge - Timing Information on Recordings  
REFERENCE : (a) Project Communication Officer's Memorandum  
No. [redacted] SAPC-2697, dated 22 November 1955  
to Project Director  
(b) Project Director Memorandum SAPC-2698, dated  
28 November 1955 to Project Communication Officer.  
(c) Chief Operations Officer's Memorandum No. SAPC-2540,  
dated 1 December 1955 to Project Director.

1. References cited indicate that no discussion has been arrived at with reference to a policy for timing or standardizing timing, on missions utilizing several systems.

2. Operations indicates that the plan suggested in 2.c. of reference (a) will suffice for the photograph considerations. They have no strong objections to the plan suggested in 2.a. of reference (a) and endorsed by the Project Director in reference (b). It is agreed that TIME in any case be common and uniform to all the systems.

3. Unless other valid considerations are evident it is apparently the consensus that TIME to be measured and recorded should be "TIME FROM TAKE-OFF."
